And as streams of light fan out behind the darkened sun like the wings of a butterfly, I realize that I never saw real beauty until now. At Moon Shadow, an isolated campground, thousands have gathered to catch a glimpse of a rare and extraordinary total eclipse of the sun. It's also were three lives are about to be changed forever: Ally likes the simple things in life—labyrinths, star-gazing, and comet-hunting. Her home, the Moon Shadow campground, is a part of who she is, and she refuses to imagine it any other way. Popular and gorgeous (everybody says so), Bree is a future homecoming queen for sure. Bree wears her beauty like a suit of armor. But what is she trying to hide? Overweight and awkward, Jack is used to spending a lot of time alone. But when opportunity knocks, he finds himself in situations he never would have imagined and making friends in the most unexpected situations. Told from three distinct voices and perspectives, Wendy Mass weaves an intricate and compelling story about strangers coming together, unlikely friendships, and finding one's place in the universe.

This work offers a study on the problematic of a scientific knowledge of the sensible reality in the Enneads. In so doing, it presents a radical new perspective on the philosophy of Plotinus and engages in an intense, detailed, and critical rereading of Plotinus and his commentators.

Eclipse of a Soul is a must read for anyone struggling with their faith. This is a beautifully written book chronicling the journey of a woman who felt lost in her faith and has now returned to living life to the fullest with her God. The title of the book says it all! Sister Maureen D’Onofrio,
Raised in Massillon, Ohio, Bev graduated in 1969 from Central Catholic High School and later earned her MSN at The University of Akron. Her nursing career spanned Intensive Care to Director of Nursing. After a thirty-year absence, she returned to church and rediscovered the Lord. "My questions, fears, and doubts melted, revealing a glorious future with the Lord!" This culminated in a very close relationship with God, as reflected in her first book titled, I Open Myself to You, Oh Lord! "I hope that others will be able to relate their lives to the challenges of my journey from darkness (hopelessness) to Light (peace), by finding God in their lives. At the end of my soul’s eclipse, the corona of God showed me His Love and Forgiveness, salvation through Christ and guidance through the Holy Spirit." Bev is married to Douglas and resides in Liverpool, New York.

Plato held the eternity of matter. The material of which the world was formed was originally a shapeless mass existing from eternity. It was arranged in perfect and beautiful forms by God. Plato comments on the nature of the soul, the soul of the world, the origin of evil, and the four original elements of all created, corporeal things. But the soul is both created and uncreated. The subject is illustrated by geometry and the doctrine of ratios, and by the musical scale. The divisible and the indivisible are the Other and the Same. The opinion of those philosophers refuted who make the soul a compound of both. Two discordant principles rule the world: Fate or Necessity, and Intelligence or Wisdom. The soul is not altogether the workmanship of the Deity: Illustrations from geometry, the planetary system, and the science of music. The soul derives its beginning neither from time nor is the product of generation, but it is endowed with several faculties and virtues.

Pulitzer Prize winner Tracy Kidder memorably records the drama, comedy, and excitement of one company’s efforts to bring a new microcomputer to market. Computers have changed since 1981, when The Soul of a New Machine first examined the culture of the computer revolution. What has not changed is the feverish pace of the high-tech industry, the go-for-broke approach to business that has caused so many computer companies to win big (or go belly up), and the cult of pursuing mind-bending technological innovations. The Soul of a New Machine is an essential chapter in the history of the machine that revolutionized the world in the twentieth century.

One hundred years before Freud’s striking psychoanalytic case-histories, the narrative psychological case-history emerged in the second half of the eighteenth century in Germany as an epistemic genre (Gianna Pomata) that cut across the disciplines of medicine, philosophy, law, psychology, anthropology and literature. It differed significantly from its predecessors in theology, jurisprudence, and medicine. Rather than subsuming the individual under an established classification, moral precept, category, or type, the narrative psychological case-history endeavored to articulate the individual in its very individuality, thereby constructing a ‘self’ in its irreducible singularity. The presentation and analysis of several significant psychological case-histories, their theory and practice, as well as the controversies surrounding their utility, validity, and function for an envisioned ‘science of the soul’ constitutes the core of the book. Close and ‘distant’ (F. M oretti) readings of key texts and figures in the discussion regarding ‘empirical psychology’ (psychologia empirica), experiential psychology (Erfahrungsseelenkunde) and ‘medical psychology’ (medizinische Psychologie) such as Christian Wolff, J.C. Krüger, J.C. Bolton, Ernst Nicolai, J.A. Unzer, J.G. Sulzer, J.G. Herder, Friedrich Schiller, Jacob Friedrich Abel, Marcus Herz, Karl Philipp Moritz, J.C. Reil, Ernst Platner and Immanuel Kant provide the disciplinary, historical-scientific context within which this genre comes to the fore. As the first systematic argument concerning the early history of this genre, my thesis is that the psychological case-history evolved as part of a pastoral apparatus of care, concern, guidance and direction for what it fashioned as the ‘unique’ individual, as the discursive medium in a process by which the soul became a ‘self’. The narrative psychological case-history was in fact a meta-
genre that transcended traditional boundaries of history and fiction, medicine and philosophy, psychology and anthropology, and sought, for the first time, to explicitly link the experience, history, memory, fantasy, previous trauma or suffering of a unique individual to illness, deviance, aberration and crime. In a word, it demonstrated, as Freud later said of his own case-histories in Studies on Hysteria, “the intimate relation between the history of suffering and the symptoms of illness” (”die innige Beziehung zwischen Leidensgeschichte und Krankheitssymptome”). This genre not only had a profound and far-reaching effect on the evolution of German and European literature – one thinks of the rich traditions of the Novella and the Fallgeschichte from Goethe, Büchner, R. L Stevenson, Edgar Allen Poe and Chekhov to Kafka and beyond – but in shaping modern literature, the clinical sciences, and even popular culture. The book should therefore be of interest not merely to Germanists, modern European cultural historians, historians of science, and literary historians, but also those interested in the history of medicine and psychology, the origins of psychoanalysis, the history of anthropology, cultural studies, and, more generally, the history of ideas.

A profound and in-depth dialog of Spirit-guided insights describing the nature of the soul essence and presenting imaginative, practical tools to transform human dramas. Addressing commonly asked questions, Opening a Window to the Soul presents a unique way to understand how the world operates, heal painful emotions, get along with difficult people, and clear unhealthy patterns. With potent examples from the author’s personal journey as well as client sessions, the messages are compassionate, enlightening and universally applicable. Topics include: the nature of the soul essence; what’s between lives; soul memories, emotions, ego, and creative thought as aspects of the âEarth Suit; how past life experiences impact present time; the soul family as relating to childhood and karmic agreements; love relationships and soul mates; working with the Spirit team (soul family guides) and soul purpose.

In Search of Soul explores the meaning of “soul” in sacred and profane incarnations, from its biblical origins to its central place in the rich traditions of black and Latin history. Surveying the work of writers, artists, poets, musicians, philosophers and theologians, Alejandro Nava shows how their understandings of the “soul” revolve around narratives of justice, liberation, and spiritual redemption. He contends that biblical traditions and hip-hop emerged out of experiences of dispossession and oppression. Whether born in the ghettos of America or of the Roman Empire, hip-hop and Christianity have endured by giving voice to the persecuted. This book offers a view of soul in living color, as a breathing, suffering, dreaming thing.

Psychology that ignores the soul is indeed an odd sort of psychology. But such it is in many colleges today. On the basis of thoroughgoing materialism it has to be nothing more than the physiology of the nervous system. Hence a sound philosophical study of the soul is timely. Where are we to find an exposition and proof of the basic truths on which the structure of psychology must be erected? They are in St. Thomas’ DE ANIMA. This opusculum discusses twenty-one questions about the soul, among which are the following: Whether the angel and the human soul differ specifically. Whether the soul is in the whole body and in each part of it. Whether the soul is identical with its powers. Whether the soul, existing apart from the body,
can suffer punishment by corporeal fire. Doctor Rowan's translation, though a faithful rendition of the original, is in clear, readable English. The value of this version is greatly enhanced by copious footnotes of two kinds: exact citations of authors (e.g., Aristotle, St. Augustine) to whom St. Thomas refers; explanations of terms and views that otherwise might be obscure to modern readers. The translator has also provided a comprehensive index.

Ally, Bree, and Jack meet at the one place the Great Eclipse can be seen in totality, each carrying the burden of different personal problems, which diminish when compared to the task they embark upon and the friendship they find.

"This biography traces the output of jazz master Charles Mingus--his recordings, his compositions, and his writings--highlighting key moments in his life and musicians who influenced him and were influenced by him. As a young man, Mingus played with Louis Armstrong as well as with Kid Ory. Mingus also played in bands led by Duke Ellington, Charlie Parker, Lionel Hampton, Red Norvo, Art Tatum, and many others. He began leading his own bands in New York City in 1955. Eric Dolphy, Rahsaan Roland Kirk, Jimmy Knepper, Jackie McLean, Toshiko Akiyoshi, Cat Anderson, and Jaki Byard are among the many distinguished jazz artists who made music with Mingus during the 1950s, 1960s, and 1970s. In addition to leaving behind a large collection of compelling recordings by large and small units, Mingus was also a talented writer. His autobiography, Beneath the Underdog: His World Composed by Mingus, is unlike any other book by a major jazz artist. Mingus creates vivid portraits of the many people who passed through his life and tells his story with compelling prose. Mingus also wrote a good deal of poetry and prose, all of it reflecting his unique vision. In 1977 he was diagnosed with amyotrophic lateral sclerosis. After several months of steady deterioration, he died in 1979 in Mexico"--Provided by publisher.

An excellent analysis of Aristotle's philosophy of science, logic, and metaphysics
A compassionate and resourceful guide to bring help and hope to those contemplating suicide and those who love them.

If you have found the Psalms a source of comfort and strength, you will love this treatment of the first thirty psalms. Each psalm contains a commentary on the entire psalm, not just a verse or two. You will find the psalms like a mirror reflecting back to you experiences and emotions you yourself have had at one time or another. That's why the message they carry is as up to date as the morning newspaper. The psalmist has found his solutions in God, and we may find ours there as well. There is an old song which goes, "Where could I go but to the Lord?" The psalmist sounds that note again and again. The old gospel song puts it well, On Christ the solid Rock I stand, All other ground is sinking sand All other ground is sinking sand.

￥ What does it mean to be human? ￥ How does a right understanding of personhood affect decisions on critical life situations? ￥ What implications does a biblical perspective on personhood have for the pastoral ministry of healing and hope? In answering these questions, Ray S. Anderson focused on the person as determined by and sustained by the creative power of God. He explored the implications of a biblical understanding of personhood for such critical issues as human sexuality, family relationships, abortion, and death. He broke new ground in relating pastoral care and counseling to contemporary issues which challenge Christians and their understanding of the meaning of human life.
