The Greatest Man Who Ever Lived

CDL Practice Test Study Guide: General Knowledge

Chris Aragon provides a direct, somewhat cynical, and slightly gruff look at the everyday tasks and responsibilities of being an Over The Road Truck Driver as an employee of a very large trucking company. Hollywood has always painted the public picture of what yesterday's trucker looked like, but Chris's hard toned look at the modern and highly regulated Commercial Drivers License paints a much different picture. With Road Safety at the center, Chris attempts to explain some of the complexity that is today's Trucking Industry for the Non-Owner-Operator of the 18 Wheeler Culture. From the starting point of obtaining a Class A Commercial Driver's License to the day to day dealings with company management to the suggestions for comfort while out on a national tour, Chris lays his no nonsense approach out in a raw sense without the hidden meanings tucked in the folds. In Chris's previous full career as a Corrections Officer Sergeant in a maximum security setting, he developed a Funny Frowned Face as opposed to a poker face in communicating his thoughts. Chris often jokes about his Grumpy Personality with many of his friends and family and he hopes that the raw and pungent outlay doesn't protrude itself as overly provocative to any reader.

Neenah Ellis always wanted to live to 100, and her fascination led her to interview centenarians from all over the country about what life was like at the very beginning of the century, and how things have changed over time. Ellis, a producer for National Public Radio, spent an unforgettable year traveling with her tape recorder and listening to the stories of America's oldest men and women. She met a couple who courted by horse and sleigh in Vermont during the winter of 1918, and she spent a week with the oldest living black lesbian in America. She visited a nationally known expert on dyslexia who published a book at 96 and whose great-great-grandfather was a colonel in Washington's army; and she met Anna Wilmot, the row-boating centenarian from New England who captured the hearts of thousands of NPR listeners with her confession that she swims in the buff only "when it's foggy and there's no fisherman around." history project, Ellis's year of interviews became much more, a personal journey of growth and transformation. Once she had put away the exigencies of her cusp-of-the-millennium life-her deadlines, the intense focus on current events, the endless email and ringing phones-she began to learn the kinds of things that we do from much older people. She started to connect in her conversations with them, and to see the virtue of looking forward, as the centenarians did, not backward. They reminded her that the moment-this very moment that we're in right now-is precious and fine. And that the true richness of life is to be found in each other-in our marriages and friendships, in the intellectual life that we share with each other, and in the ways that we become connected. Their stories add up to a course in living well, with lessons and inspiration for all of us.

[A Motor Carrier's Guide to Improving Highway Safety](#)

To help assess proposals for further changes in federal truck weight limits, Congress requested this study through Section 158 of the Surface Transportation and Uniform Relocation Assistance Act of 1987. To conduct the study, the National Research Council convened a special Transportation Research Board committee with experts in pavements, bridges, highway safety, freight transportation economics, motor vehicle design, highway administration, motor carrier operations, and enforcement of motor vehicle regulations. The study focused on four issues identified in the study request that involve potential changes to federal weight limits for Interstate highways: (1) Elimination of existing grandfather provisions; (2) Alternative methods for determining gross vehicle weight and axle loadings; (3) Adequacy of the current federal bridge formula; and (4) Treatment of specialized hauling vehicles--garbage trucks, dump trucks, and other trucks with short wheel bases that have difficulty complying with the current federal bridge formula. For each of these issues, the study committee estimated the nationwide effects of changes in federal limits proposed by the trucking industry, highway agencies, and other groups. Projections of heavy-truck miles by type of truck, region of the country, highway functional class, and operating weight were developed for a base case and alternative truck weight regulatory scenarios. These projections were then used to estimate impacts on truck costs, pavements, bridges, and safety.
