The field of family, child, and couple assessment continues to evolve and change since the first edition of this book appeared in 2004. Couple and Family Assessment, Third Edition, is a thoroughly revised and updated resource for anyone working with children, adolescents, couples, and families. It provides an in-depth description of an even larger number of clinically useful assessment tools and methods, including issue-specific tools, self-report inventories, standardized inventories, qualitative measures, and observational methods. Each chapter provides strategies for systematically utilizing these various assessment methods and measures with a wide range of family dynamics that influence couples and families. These include couples conflict, divorce, separation, mediation, premarital decisions, parenting conflicts, child abuse, family violence, custody evaluation, and child and adolescent conditions, i.e., depression, anxiety, conduct disorder, bipolar disorder, obsessive compulsive disorder, autism, Asperger’s syndrome, and learning disorders that can significantly influence family dynamics. This third edition features the latest, most common and important assessment tools and strategies for addressing problematic clinical issues related to working with families, couples, and
children. Chapters 3 through 11 include matrices that summarize pertinent information on all instruments reviewed, allowing readers to instantly compare more than 130 assessment devices. Finally, the book provides extensive clinical case material that illustrates the use of these various assessment tools and strategies in a wide array of clinical situations. Couple and Family Assessment, Third Edition, will be useful to both trainees and practitioners as a ready reference on assessment measures and strategies for working with families, couples, and children.

This book highlights assessment techniques, issues, and procedures that appeal to practicing clinicians. Rather than a comprehensive Handbook of various tests and measures, The Clinical Assessment of Children and Adolescents is a practitioner-friendly text that provides guidance for test selection, interpretation, and application. With topics ranging from personality assessment to behavioral assessment to the assessment of depression and thought disorder, the leaders in the field of child and adolescent measurement outline selection and interpretation of measures in a manner that is most relevant to clinicians and graduate students. Each chapter makes use of extensive case material in order to highlight issues of applicability.

The Clinical Assessment of Children and Adolescents

Now available in paper for the first time, this volume brings together leading contributors to provide a comprehensive review of theory, research, and practice in child and adolescent personality assessment. Organized for easy reference, the book is divided into four parts. Part I summarizes basic theories, issues, and concepts, setting forth a framework for assessment as a hypothesis-generating, problem-solving process. Part II describes and evaluates a wide range of relevant approaches, tests, and techniques, marshaling the available data and reviewing administration procedures, scoring, and interpretation. In Part III, the process by which personality assessment is translated into effective intervention strategies and programs for children is examined in depth. A summary of major perspectives and recommended practices is presented in Part IV, which also considers future needs and directions for the field.

The second edition of this comprehensive volume presents methods for nonverbal assessment of diverse individuals, such as persons with speech or hearing deficits, limited English skills, or emotional problems. Chapters provide a contemporary context for nonverbal evaluations, accompanied by descriptions of best practices in detecting bias in cognitive tests, multicultural assessment, cross-battery assessment of nonverbal cognitive ability, and psychological and physiological influences on assessment. The book discusses nonverbal assessment of cognition and intelligence as well as related domains, such as academic skills, neurocognitive functioning, personality, and behavior issues. Guidelines for using common nonverbal assessment tools and strategies feature the most up-to-date information on administration and scoring, psychometric properties, and strengths and limitations. Best practices for testing diverse children and adults and using reliable, valid, and fair assessment instruments are emphasized throughout the book. Featured instruments in the Handbook include: The Universal Nonverbal Intelligence Test, Second Edition (UNIT2). The newest version of the Leiter International Performance Scale (Leiter-3). The Wechsler Nonverbal Scale of Ability (WNV). The Comprehensive Test of Nonverbal Intelligence, Second Edition (CTONI-2). The Test of Nonverbal Intelligence. The General Ability Measure for Adults (GAMA). The Second Edition of the Handbook of Nonverbal Assessment is a must-have resource for researchers and graduate students in school and clinical child psychology, speech and language pathology, educational technology, social work, and related disciplines as well as clinicians, professionals, and in-service educators of diverse students.

Interest in children's drawings is contemporary with the birth of modern psychology but as yet there is no psychological theory that successfully accounts for the nature of children's drawing. The two main theories, visual realism and intellectual realism, fall short. The work of Georges-Henri Luquet is important because it goes beyond both theories. Luquet's work, though important and of interest to developmental psychologists, remains untranslated to date and so is often inaccurately cited. This translation of Le Dessin Enfantin makes Luquet's ideas available to a wider readership for the first time.

Drawing is a language, projected by children and adults, reflecting their joy and pain. It is used extensively by clinical psychologists, art therapists, social workers, and other mental health professionals in the assessment and treatment of children, adolescents, adults, and couples. This book brings together a renowned group of professionals to analyze the research and application of the most popular assessment and treatment tools. Tests discussed include the Draw-a-Person Test, the House-Tree-Person Test, the Kinetic Family Drawing Test, the Art Therapy-Projective Imagery Assessment, and the Wartegg Drawing Completion Test. Working with sexually and physically abused children, assessing clients with anorexia nervosa, and the influence of osteopathic treatment on drawings are some of the special topics considered. Numerous case studies are also included.

Handbook of Personality Assessment

Child and Adolescent Mental Health

In the present volume, we collected state-of-the-art chapters on diagnosis, treatment, and social implications. The first section describes diagnostic
processes. It describes a reevaluation of projective techniques, a new clinical
tool in psychotraumatology, the foundations of the framing technique, and an
overview on integrative approaches. The second section focuses on new
developments in the field with special emphasis on culture-specific contexts.
From parenting of adolescents in India to the influence of poverty on mental
health issues in Mexico, as well as the use of marijuana and Internet addiction,
some of the most important fields are highlighted. The third section
concentrates on therapy. It shows how to react to bullying and reviews the use
of antidepressants in children and adolescents.

Assessment of Couples and Families considers the impact of recent changes on
the assessment process and provide practitioners with a review of
contemporary techniques and the means by which they can be implemented into
practice in conjunction with new reporting inventories and observational
methods. These new assessment strategies will be presented collaterally with
case material that addresses a specific problem, such as family violence or
marital suitability. This unique problem focus will provide practitioners with a
handy point of reference to acquaint themselves with modern practice
techniques that address issues new to the therapy session while providing a
supplement to coursework on assessment.

Drawing the Line

How do we move from an understanding of the administration, scoring, and
interpretation of responses on various personality assessment instruments to
the ability to put our understanding into words and communicate it effectively
to referral agents and to patients themselves? And how do we transmit that
ability to students? Teaching and Learning Personality Assessment strives to fill
a gap in the literature and in many training programs. The editors have
assembled a group of renowned clinicians, noted not only for their own acumen
in personality assessment but also for their teaching talent, who present in
detail time-tested techniques for teaching assessment. Readers have the
opportunity to "sit beside" these seasoned mentors and learn their special skills.
Numerous examples illustrate the key concepts. For every instructor of
personality assessment who has ever pondered ways to organize a course or to
convey difficult material, and for every student who has worried about how to
translate theory into practice, in the context of a course or on his or her own,
this book will offer enlightenment and provide uniquely practical assistance. It
will be important reading for psychologists and trainees at every level of
experience. Its clear style, vivid anecdotes, frank discussion of disagreements in
the field, and innovative ideas make it an excellent text for both introductory
and advanced courses.

This book contains the first documentation of combining house, tree, and person into a single drawing. It helps enrich clinician’s test batteries and aids psychologists and physicians in understanding the emotions and self-awareness of their clients. It is richly illustrated and teaches the important skill of using visual metaphors in clinical settings to understand and assist clients. The author covers all aspects of drawing interpretation, including size, placement, stroke or line characteristics, and the possible individual characteristics of each element within the house, tree, and person drawings.

This resourceful guide presents art therapy techniques for difficult clients where the typical therapist-client interaction can often be distant, demanding, and frustrating. Offering practical and theoretical information from a wide variety of treatment populations and diagnostic categories; and incorporating individual, group, and family therapy case studies, the text is filled with examples and over 150 illustrations taken from the author’s sixteen years of experience working with hundreds of clients. The author is a licensed Marriage and Family Therapist with a Master’s degree in Clinical Art Therapy. The text comes with an accompanying CD-ROM which includes full-color pictures and additional material not found in the book.

The Assessment of Child and Adolescent Personality

Ethnic minority children now comprise over 75 percent of students in 100 of the largest cities in the United States. However, these students have not been given equal access to, nor benefited from, the contemporary mental health system as have their non-minority peers. TEMAS (Tell-Me-A-Story) Assessment in Multicultural Societies examines the health/mental care system in which professional service providers, including psychologists, labor to offer quality care for youth in the United States. The authors ardently support the use of the TEMAS assessment instrument as a useful tool for diagnosis of all youngsters, particularly its use on the growing population of minority children and adolescents. Part I presents a rationale and context for employing TEMAS. Introductory chapters describe the mental health status of the population at-risk, as well as systems of care for youth where assessment and intervention are components. Topics to follow highlight a history of positive TEMAS test reviews with the detail required by instructors for preparing dedicated TEMAS courses. The volume thoroughly outlines cross-cultural studies and illustrates case examples of European-American, Hispanic/Latino, Asian-American, and forensic studies. TEMAS (Tell-Me-A-Story) Assessment in Multicultural Societies brings practical insight to instructors who teach standard assessment courses; clinicians, counselors, and school psychologists; assessment specialists; and administrators concerned with mental health services designed for children and adolescents.

The Art Therapists' Primer

Doctor Ellen G. Horovitz shares over 40 years of experience as she transliterates evidence-based art therapy into medical terminology. This revised and updated Third Edition spells out the how-to's behind producing art therapy assessments, process notes, significant sessions, objectives and modalities, termination summaries and internet-based assessments into translatable documentation, designed to dovetail within an interdisciplinary medical model. In addition, this third edition emphasizes information on how to use psychological applications and art therapy based assessments to ensure best practices and efficacy of patient care. This step-by-step methodology fashions these reports, placing art therapy on equal footing with all mental health clinicians and generates records, which serve as points of departure for practitioners. This text is designed as a teaching tool that lays the foundation to enhance pertinent skills that are important to patient practice, including the armament to write up clinically-based reports that serve as a model for the field. Additionally, the practitioner is offered sample formats, legends and abbreviations of clinical and psychiatric terms, guidelines for recordable events, instructions of writing up objectives, modalities, and treatment goals as well as training on composing progress versus process notes. The Appendices provides

a wealth of information and forms to use in one's clinical practice. This must-have reference manual amasses information that will serve as a companion guide for every art therapist to formulate clinical reports, and it will aid patients toward their trajectory of wellness, recovery and, above all, health.

Couple and Family Assessment

This new edition with its revised title provides critical reviews of art therapy tests along with some new reviews of assessments and updated research in the field. It is comprehensive in its approach to considering reliability and validity evidence provided by test authors. Additionally, it reviews research on art therapy assessments with a variety of patient populations. The book contains helpful suggestions regarding the application of art therapy assessments. Specific areas covered include individual, group, family, and multicultural assessment techniques. The desirable and undesirable features of a variety of art therapy assessments are deliberated. The book critiques a series of art therapy assessments - from traditional art therapy approaches to current releases. The goal of this work is to assist mental health professionals in selecting assessments that yield reliable and valid clinical information regarding their clients. Of special interest is the author's approach to writing the results of a series of art therapy assessments in an effort to provide a more complete indication of client dynamics and issues. It will be a valuable resource for practitioners who use art therapy as an adjunct or primary therapy, and it will serve to enhance clinical skills, making therapy more effective for each patient who participates in the assessment process.

The use of drawings to discover emotions, attitudes, and personality traits not verbally stated by a client is a valuable and widely used technique in psychoanalysis and psychotherapy. In this book, the author offers a highly practical introduction to the use and interpretation of projective drawings. Grounding his approach in self psychology, Dr. Leibowitz provides detailed information on how to interpret house, tree, man, woman, and animal drawings. By pairing clinical case examples with general interpretation guidelines, the book offers a thorough examination of projective drawings, making it a valuable text for beginners and an important reference source for the seasoned clinician. Interpreting Projective Drawings contains an impressive array of drawings, with over 175 total illustrations. Almost half of these drawings are from comprehensive case studies that follow adult patients from the beginning phase of treatment to their one-year (or more) status. These include over 30 chromatic illustrations that clearly demonstrate the importance of color in projective drawing interpretation. In addition to detailed information on how to interpret these five types of achromatic and chromatic drawings, the book also contains an appendix that offers examiner instructions, instructions for self-administration, and adjective lists to aid in interpretation. Together, these components make Interpreting Projective Drawings an essential resource for any mental health professional interested in using drawings to their fullest effect in their practice.
