Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing
doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation’s finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

The Bill of Rights was written more than 200 years ago, but it's still just as relevant and important today as it was back then. Readers will take a look at what caused the Tenth Amendment to be born and what effects the amendment has had through history and today.

This is a print on demand edition of a hard to find publication. The lines of authority between states and the federal govt. are, to a significant extent, defined by the U.S. Constitution and relevant case law. In recent years, however, the Supreme Court has decided a number of cases that would seem to re-evaluate this
historical relationship. This report discusses state and federal legislative power, focusing on a number of these "federalism" cases. The report does not, however, address the larger policy issue of when it is appropriate "as opposed to constitutionally permissible" to exercise federal powers. Contents: Powers of the States; Powers of the Federal Gov’t.; The Commerce Clause; The 14th Amendment; The 10th Amendment; 11th Amend. and State Sovereign Immunity; The Spending Clause; Conclusion.

There are over 3,400 state and local pension systems in the United States, according to the most recent Census Bureau Survey of State and Local Public-Employee Retirement Systems. Most large plans are state plans, and more state and local employees are covered by state-administered plans than by locally-administered plans (about 24 million members and beneficiaries compared with about 3 million). However, there are more local government employees than state government employees (about 14 million compared with about 5 million), and while local governments sometimes participate in plans administered by states, the local governments generally retain responsibility for contributing the employer's share of funding to the plans for their employees. As a result, local governments contribute more to pension plans each state fiscal year, overall, than do state governments.
